Overview

Data-driven and creative final-year B.Tech Computer Engineering student specialising in Artificial Intelligence and Data Science, passionate about leveraging analytics, algorithms, and keyword strategy to optimise YouTube content performance and SEO. Experienced with data analysis, automation, and digital content systems, bringing a unique technical perspective to audience growth, engagement, and video discoverability.

Education

K J Somaiya Institute of Technology, Sion

Bachelor's of Technology in Computer Engineering | CGPA : 8.5/10 (Till 7th Semester)

Mumbai, India

(2022 - Present)

Sardar Vallabhbhai Patel Junior College of Science & Commerce

Thane, India

HSC (PCM) | 70.00%

(2020-2022)

Internships

3D Modelling and AI Integration Intern - AI Execute | Mumbai (Remote)

1st Jun 2025 – 1st Aug 2025

- Engineered a 3D animated chatbot with speech, lip-sync, and expressive animations, powered by OpenRouter API, integrating multiple free LLMs for advanced conversational capabilities.

Data Science Intern - Tasklance AI | Pune (Remote)

1st Jan 2025 – 24th Apr 2025

- Implemented an eczema disease classifier leveraging the Gemini Vision API, including data preprocessing, image analysis, and model integration to achieve high diagnostic accuracy

Web Development Intern - Internchain | Mumbai (Remote)

1st Dec 2023 – 31st Dec 2023

- Designed and implemented a user-friendly Login/Signup interface and a personal portfolio site utilizing HTML and CSS, ensuring responsive design and clean aesthetics.

Projects

YouTube SEO & Channel Growth Audit (Case Study) | vidIQ, YouTube Studio, AI Tools

- Conducted a comprehensive SEO audit using vidIQ and Google Trends to identify high-volume, low-competition keywords for niche-specific content growth.
- Optimised video metadata pipelines, including search-friendly titles, keyword-rich descriptions, and automated timestamps to boost Google and YouTube search indexing.

Conversational 3D AI Assistant | Python, Machine Learning

- Developed an interactive 3D AI character with a graphical user interface (GUI) that integrated a multi-modal AI pipeline leveraging Large Language Models (LLMs) from OpenRouterAPI for intelligent dialogue, Text-to-Speech (TTS) for natural voice, and Rhubarb Lipsync for real-time facial animation.

Eczema Disease Classification | Python, Machine Learning

- Developed a deep learning project utilizing transfer learning and the Google Gemini Vision API to classify eczema from skin images.

Sign Language Detection Model | Python, TensorFlow, OpenCV, Teachable Machine - Google

- Developed a sign language detection model using Teachable Machine, a user-friendly platform by Google for training machine learning models.

Skills

SEO & Marketing Tools: VidIQ, TubeBuddy, Google Trends, Google Analytics, YouTube Studio Analytics, Google Search Console

Technical Skills: Python, Pandas, NumPy, Matplotlib, TensorFlow, SQL

Content Optimization: Keyword research, Metadata optimization, CTR Optimization, A/B Testing, LLM-based Scripting, Automated Metadata Generation

Creative Tools: Canva, Adobe Premiere Basics, CapCut

Version Control & Collaboration: Git/GitHub, Microsoft Excel

Additional Achievements and Experiences

DCT Head - Student's Council

- Led a team of 8 to execute a multi-platform digital media strategy for college festivals, overseeing content distribution across YouTube and Instagram.
- Analyzed engagement analytics and audience demographics to optimize posting schedules and content formats, resulting in increased organic reach and student interaction.
- Received a formal Letter of Appreciation for "technical expertise" and an "innovative approach" in streamlining the council's digital presence.

Design Head - Google Students' Developers Club

- Developed a consistent visual identity and branding strategy for event promotional materials, including brochures and social media reels.
- Optimized creative assets for higher click-through rates (CTR) by refining visual hooks and thumbnail layouts for technical workshops and events.
